

SAFETY OFFICER'S CORNER

BE THE QUALIFIED OPERATOR
WE KNOW YOU CAN BE!

We can quote a chapter and verse of the safety issues that are required on the job site, but you must make the time and take advantage of your periodic unemployment to attend the courses being offered at **YOUR TRAINING CENTERS**. We cannot help you when you call on Friday and need a 40-hour course completed for a Monday morning work opportunity.

It is your responsibility to be current with your certificates and licenses. Check what licenses you now hold, what is current or needs to be renewed? Do you have a current Hazmat 40 license? Hoisting License? O.S.H.A. 10 Hour Certificate? Forklift Certificate? Commercial Driver's License (if applicable)?, current D.O.T. card, Crane Certification?

We can only help you, if you want to be helped. It's not acceptable when you've been out of work and the Business Agent calls you for a job for Monday. You call the Training Center and you're upset when we cannot help you. Help yourself! Call now – sign up for an available course – or improve your skills on a new piece of equipment. Do it today, not tomorrow.
